

## **Guelfo Zamboni in the Garden of the Righteous**

Speech by Antonio and Luigi Zazzeri

12th April 2010

First of all we wish to thank the Association for the Garden of the Righteous and Milan's Mayor for creating this Garden and, today, adding the name of our uncle to the list of the Righteous.

This Garden is more important for the future than it is for the past. Memory of course is precious and it is the foundation of our present and future deeds, of the deeds of the future generations.

This is exactly why it is vital for the memory of those who opposed savagery, violence and evil to be preserved and transmitted so that people know that it is possible to oppose savagery and do something even when circumstances seem difficult, unsurmountable and unbearable.
